
FEZILE DABI DISTRICT MUNICIPALITY

Annual Financial statements
for the year ended 30 June 2012

General Information

Legal form of entity	An organ of state exercising legislative and executive authority.
Nature of business and principal activities	District Municipality
Mayoral committee	
Executive Mayor	Cllr MP Moshodi
Councillors	Cllr SI Mbalo (Speaker) Cllr ME Notsi Cllr AM Oliphant Cllr K Khumalo Cllr ME Magashule Cllr GN Guza
Grading of local authority	Low Capacity
Accounting Officer	Dr. MMV Mongake
Chief Finance Officer (CFO)	Mr J Reyneke (Acting)
Registered office	John Vorster Road Sasolburg 1947
Postal address	P.O Box 10 Sasolburg 1947
Bankers	ABSA BANK
Auditors	The Auditor - General: Free State

Accounting Officer's Responsibilities and Approval

I am responsible for the presentation of these financial statements which are set out on page 5 to 56 in terms of Section 126(1) of the Municipal Finance Management Act (Act 56 of 2003), and which I have signed on behalf of the Municipality.

The annual financial statements have been prepared in accordance with South African Statements of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

I certify that the salaries, allowances and benefits of councillors as disclosed in note 14 of these annual financial statements, are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

The annual financial statements set out on page 5 to 56, which have been prepared on the going concern basis, were approved by the accounting officer on 31 August 2012 and were signed on its behalf by:

Municipal Manager
Dr. MMV Mongake
BA. Hons; Magister Artium; PhD Economics

STATEMENT OF FINANCIAL POSITION

Cash and cash equivalents at the end of the year	4	**189,807,221**	**206,198,370**

ACCOUNTING POLICIES

1. Basis of Presentation

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise. They are presented in South African Rand.

A summary of the significant accounting policies, which have been consistently applied, are disclosed below.

1.1 Presentation of currency

These annual financial statements are presented in South African Rand.

1.2 Reserves

Capital replacement reserve (CRR)

In order to finance the provision of infrastructure and other items of property, plant and equipment from internal sources, amounts are transferred from the accumulated surplus/(deficit) to the CRR in terms of a Council resolution. A corresponding amount is transferred to a designated CRR bank or investment account. The cash in the designated CRR bank account can only be utilised to finance items of property, plant and equipment. The CRR is reduced and the accumulated surplus/(deficit) is credited by a corresponding amount when the amounts in the CRR are utilised.

The CRR reserve was disestablished by council on the 16 August 2012, as it was deemed to be no longer applicable.

1.3 Revaluation reserve

The surplus arising from the revaluation of property, plant and equipment is credited to a non-distributable reserve. The revaluation surplus is realised as revalued assets are depreciated, through a transfer from the revaluation reserve to the accumulated surplus/deficit. On disposal, the net revaluation surplus is transferred to the accumulated surplus/deficit while gains or losses on disposal, based on revalued amounts, are credited or charged to the statement of financial performance.

1.4 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired at no cost, or for a nominal cost, its cost is its fair value as at date of acquisition.

ACCOUNTING POLICIES

1.4 Property, plant and equipment (continued)

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

Property, plant and equipment is stated at cost less accumulated depreciation and any impairment losses except land and buildings which are revalued at least every five years. Similarly, land is not depreciated as it is deemed to have an indefinite life.

Subsequent expenditure is capitalised when the recognition and measurement criteria of an asset are met.

Land and buildings are carried at revalued amounts, being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses in respect of buildings.

Revaluations are made with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period.

Any increase in an asset’s carrying amount, as a result of a revaluation, is credited directly to a revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

Any decrease in an asset’s carrying amount, as a result of a revaluation, is recognised in surplus or deficit in the current period. The decrease is debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

The annual depreciation rates are based on the following estimated asset useful lives:

Item	Average useful life
Land	Indefinite
Buildings	30 years
Furniture and Fittings	3 - 10 years
Motor Vehicles	
• Ambulances	5 - 10 years
• Fire engines	20 years
• Buses	15 years
• Trucks and light delivery vehicles	5 - 7 years
• Ordinary motor vehicles	5 - 7 years
• Motor cycles	3 years

ACCOUNTING POLICIES

1.4 Property, plant and equipment (continued)

Office Equipment	
• Computer hardware	5 years
• Computer software	3 - 5 years
• Office machines	3 - 5 years
• Air conditioners	5 - 7 years
Emergency Equipment	
• Fire hoses	5 years
• Other fire-fighting equipment	15 years
• Emergency lights	5 years
Other property, plant and equipment	
• Lawn mowers	2 years
• Compressors	5 years
• Laboratory equipment	5 years
• Radio equipment	5 years
• Firearms	5 years
• Telecommunication equipment	5 years

ACCOUNTING POLICIES

1.4 Property, plant and equipment (continued)

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Impairment

The entity assess at each report date whether there is any indication that an asset may be impaired. If any such indication exists, the entity estimates the recoverable amount of the asset.

If, and only if the recoverable service amount of an asset is less than its carrying amount, the carrying amount of the asset shall be reduced to its recoverable service amount. That reduction is an impairment loss.

An impairment loss shall be recognised immediately in surplur or deficit, unless the asset is carried at a revalued amount in accordance with another Standard of GRAP (for example, in accordance with the revaluation model in the standard of GRAP on Property, Plant and Equipment). Any impairment loss of a revalued asset shall be treated as a revaluation decrease in accordance with that Standard of GRAP.

An impairment loss recognised in prior periods for an asset shall be reversed if, and only if, there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. If this is the case, the carrying amount of the asset shall, except as described in paragraph. 65 of GRAP 21, be increased to its recoverable service amount. That increase is a reversal of an impairment loss.

The increased carrying amount of an asset attributable to a reversal of an impairment loss shall not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised in prior periods.

A reversal of an impairment loss for an asset shall be recognised immediately in surplus or deficit unless the asset is carried at revalued amount in accordance with another Standard of GRAP (for example, in accordance with the revaluation model in the standard of GRAP on Property, Plant and Equipment). Any reversal of an impairment loss of a revalued asset shall be treated as a revaluation increase in accordance with that Standard of GRAP.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the asset shall be adjusted in future period to allocate the asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Derecognition

The carrying amount of an item of property, plant and equipment shall be derecognised:
- on disposal, or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of an item of property, plant and equipment shall be included in surplus or deficit when the item is derecognised. (unless the Standard of GRAP on Leases requires otherwise on a sale and leaseback). Gains shall not be classified as revenue.

ACCOUNTING POLICIES

1.5 Financial instruments

Classification

The municipality classifies financial assets and financial liabilities into the following categories:

- Financial assets at fair value through surplus or deficit - designated
- Held-to-maturity investment
- Loans and receivables
- Available-for-sale financial assets

Classification depends on the purpose for which the financial instruments were obtained / incurred and takes place at initial recognition. Classification is re-assessed on an annual basis, except for derivatives and financial assets designated as at fair value through surplus or deficit, which shall not be classified out of the fair value through surplus or deficit category.

Loans and receivables/payables are non-derivative financial assets/liabilities with fixed or determinable payments that are not quoted in an active market. They are included in current assets/liabilities, except for maturities greater than 12 months after the balance sheet date. These are classified as non-current assets/liabilities. The municipality's loans and receivables/payables comprise 'trade and other receivables/payables' and cash and cash equivalents in the balance sheet.

Initial recognition and measurement

Financial instruments are recognised initially when the municipality becomes a party to the contractual provisions of the instruments.

The municipality classifies financial instruments, or their component parts, on initial recognition as a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement.

Financial instruments are measured initially at fair value, except for equity investments for which a fair value is not determinable, which are measured at cost and are classified as available-for-sale financial assets.

For financial instruments which are not at fair value through surplus or deficit, transaction costs are included in the initial measurement of the instrument.

Transaction costs on financial instruments at fair value through surplus or deficit are recognised in surplus or deficit.

Subsequent measurement

Financial instruments at fair value through surplus or deficit are subsequently measured at fair value, with gains and losses arising from changes in fair value being included in surplus or deficit for the period.

Net gains or losses on the financial instruments at fair value through surplus or deficit include dividends and interest.

Dividend income is recognised in surplus or deficit as part of other income when the municipality's right to receive payment is established.

Loans and receivables are subsequently measured at amortised cost, using the effective interest method, less accumulated impairment losses.

Held-to-maturity investments are subsequently measured at amortised cost, using the effective interest method, less accumulated impairment losses.

Available-for-sale financial assets are subsequently measured at fair value. This excludes equity investments for which a fair value is not determinable, which are measured at cost less accumulated impairment losses.

ACCOUNTING POLICIES

1.5 Financial instruments (continued)

Gains and losses arising from changes in fair value are recognised in equity until the asset is disposed of or determined to be impaired. Interest on available-for-sale financial assets calculated using the effective interest method is recognised in surplus or deficit as part of other income. Dividends received on available-for-sale equity instruments are recognised in surplus or deficit as part of other income when the municipality's right to receive payment is established.

Changes in fair value of available-for-sale financial assets denominated in a foreign currency are analysed between translation differences resulting from changes in amortised cost and other changes in the carrying amount. Translation differences on monetary items are recognised in surplus or deficit, while translation differences on non-monetary items are recognised in other comprehensive income and accumulated equity.

Receivables from exchange transactions

Trade and other receivables are classified as loans and receivables

Accounts receivable are carried at anticipated realisable value. An estimate is made for doubtful receivables based on a review of all outstanding amounts at year end. Bad debts are written off during the year in which they are identified.

Payables from exchange transactions

Trade payables are stated at their nominal value.

Cash and cash equivalents

Cash includes cash on hand and cash with banks. Cash equivalents are short-term highly liquid investments that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of changes in value.

For the purpose of cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks and short term deposits in financial instruments, net of bank overdrafts.

Held to maturity

These financial assets are initially measured at fair value plus direct transaction costs.

At subsequent reporting dates these are measured at amortised cost using the effective interest rate method, less any impairment loss recognised to reflect irrecoverable amounts. An impairment loss is recognised in surplus or deficit when there is objective evidence that the asset is impaired, and is measured as the difference between the investment’s carrying amount and the present value of estimated future cash flows discounted at the effective interest rate computed at initial recognition. Impairment losses are reversed in subsequent periods when an increase in the investment’s recoverable amount can be related objectively to an event occurring after the impairment was recognised, subject to the restriction that the carrying amount of the investment at the date the impairment is reversed shall not exceed what the amortised cost would have been had the impairment not been recognised.

Financial assets that the municipality has the positive intention and ability to hold to maturity are classified as held to maturity.

Gains and losses

A gain or loss arising from a change in a financial asset or financial liability is recognised as follows:

ACCOUNTING POLICIES

1.5 Financial instruments (continued)

- A gain or loss on a financial asset or financial liability classified as at fair value through surplus or deficit is recognised in surplus or deficit;
- A gain or loss on an available-for-sale financial asset is recognised directly in net assets, through the statement of changes in net assets, until the financial asset is derecognised, at which time the cumulative gain or loss previously recognised in net assets is recognised in surplus or deficit; and
- For financial assets and financial liabilities carried at amortised cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, and through the amortisation process.

Derecognition

Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised where:

- the rights to receive cash flows from the asset have expired;
- the municipality retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement; or
- the municipality has transferred its rights to receive cash flows from the asset and either
  - has transferred substantially all the risks and rewards of the asset, or
  - has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Where the municipality has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the municipality's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the municipality could be required to repay. Where continuing involvement takes the form of a written and/or purchased option (including a cash-settled option or similar provision) on the transferred asset, the extent of the municipality's continuing involvement is the amount of the transferred asset that the municipality may repurchase, except that in the case of a written put option (including a cash-settled option or similar provision) on an asset measured at fair value, the extent of the municipality's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price.

Financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in surplus or deficit.

1.6 Revenue Recognition

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Interest revenue is recognised using the effective interest rate method.

Government grants are recognised as revenue when all conditions associated with the grant have been met. Where grants have been received but the municipality has not met the condition, a liability is raised.

Amounts received from government and donors for the purpose of acquiring item of property, plant and equipment are also recognised as revenue.

ACCOUNTING POLICIES

1.6 Revenue Recognition (continued)

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

1.7 Conditional grants and receipts

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the Municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

This liability always has to be cash-backed. The following provision are set for the creation and utilisation of this creditor:

Unspent conditional grants are recognised as a liability when the grant is received.
When grant conditions are met an amount equal to the conditions met are transferred to revenue in the Statement of Financial Performance.
The cash which backs up the creditor is invested until it is utilised.
Interest earned on the investment is treated in accordance with the grant conditions. If it is payable to the funder it is recorded as part of the creditor. If it is the Municipality's income it is recognised as interest earned in the Statement of Financial Performance.

1.8 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

ACCOUNTING POLICIES

1.8 Provisions and contingencies (continued)

A constructive obligation to restructure arises only when an entity:

- has a detailed formal plan for the restructuring, identifying at least:
  - the activity/operating unit or part of a activity/operating unit concerned;
  - the principal locations affected;
  - the location, function, and approximate number of employees who will be compensated for services being terminated;
  - the expenditures that will be undertaken; and
  - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

A restructuring provision includes only the direct expenditures arising from the restructuring, which are those that are both:

- necessarily entailed by the restructuring; and
- not associated with the ongoing activities of the municipality

No obligation arises as a consequence of the sale or transfer of an operation until the municipality is committed to the sale or transfer, that is, there is a binding arrangement.

After their initial recognition contingent liabilities recognised in entity combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed.

1.9 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

Unauthorised expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No.56 of 2003).All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.10 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the municipal system Act (Act No.32 of 2000), the Public Office Bearer Act (Act No.20 of 1998) or is in contravention of the Municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as revenue in the Statement of Financial Performance.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

ACCOUNTING POLICIES

1.11 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.12 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

Finance leases - lessor

The municipality recognises finance lease receivables as assets on the statement of financial position. Such assets are presented as a receivable at an amount equal to the net investment in the lease.

Finance revenue is recognised based on a pattern reflecting a constant periodic rate of return on the municipality's net investment in the finance lease.

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis.

Income for leases is disclosed under revenue in statement of financial performance.

ACCOUNTING POLICIES

1.12 Leases (continued)

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability

1.13 Borrowing costs

Borrowing costs are recognised as an expense in the Statement of Financial Performance in the period in which they are incurred

1.14 Employee benefits

Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

Defined contribution plans

Payments to defined contribution retirement benefit plans are charged as an expense as they fall due.

Payments made to industry-managed (or state plans) retirement benefit schemes are dealt with as defined contribution plans where the entity's obligation under the schemes is equivalent to those arising in a defined contribution retirement benefit plan.

Defined benefit plans

For defined benefit plans the cost of providing the benefits is determined using the projected credit method.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan.

Consideration is given to any event that could impact the funds up to end of the reporting period where the interim valuation is performed at an earlier date.

Past service costs are recognised immediately to the extent that the benefits are already vested, and are otherwise amortised on a straight line basis over the average period until the amended benefits become vested.

To the extent that, at the beginning of the financial period, any cumulative unrecognised actuarial gain or loss exceeds ten percent of the greater of the present value of the projected benefit obligation and the fair value of the plan assets (the corridor), that portion is recognised in surplus or deficit over the expected average remaining service lives of participating employees. Actuarial gains or losses within the corridor are not recognised.

Gains or losses on the curtailment or settlement of a defined benefit plan is recognised when the entity is demonstrably committed to curtailment or settlement.

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

ACCOUNTING POLICIES

1.14 Employee benefits (continued)

The amount recognised in the statement of financial position represents the present value of the defined benefit obligation as adjusted for unrecognised actuarial gains and losses and unrecognised past service costs, and reduces by the fair value of plan assets.

Any asset is limited to unrecognised actuarial losses and past service costs, plus the present value of available refunds and reduction in future contributions to the plan.

Other post retirement obligations

The entity provides post-retirement health care benefits, housing subsidies and gratuities upon retirement to some retirees.

The entitlement to post-retirement health care benefits is based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment. Independent qualified actuaries carry out valuations of these obligations. The entity also provides a gratuity and housing subsidy on retirement to certain employees. An annual charge to income is made to cover both these liabilities.

1.15 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

Budget information in accordance with GRAP 1, has been provided in an annexure to these financial statements and forms part of the audited annual financial statements.

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are restated, unless a standard of GRAP does not require the restatements of comparative information. The nature and reason for the reclassification is disclosed.

Where material accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparative are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly.

Prior year comparatives:
When the presentation or classification of items in the annual financial statements is amended, prior year comparative amounts are reclassified. The nature and reason for the reclassification is disclosed.

1.16 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

Trade receivables / Held to maturity investments and/or loans and receivables

The municipality assesses its trade receivables, held to maturity investments and loans and receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the surplus makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

ACCOUNTING POLICIES

1.16 Significant judgements and sources of estimation uncertainty (continued)

Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in a note.

Post retirement benefits

The present value of the post retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post retirement obligations.

The municipality determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the municipality considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in Note 41.

1.17 Intangible assets

An asset is identified as an intangible asset when it:

- is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, assets or liability; or
- arises from contractual rights or other legal rights, regardless whether those rights are transferable or separate from the municipality or from other rights and obligations.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

Intangible assets are initially recognised at cost.

The cost of a separately acquired intangible asset comprises:
(a) its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates; and
(b) any directly attributable costs of preparing the asset for its intended use.

An intangible asset acquired at no or nominal cost, the cost shall be its fair value as at the date of acquisition.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the asset.
- the expenditure attributable to the asset during its development can be measured reliably.

ACCOUNTING POLICIES

1.17 Intangible assets (continued)

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Useful life
Computer software	3 - 5 years

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss is the difference between the net disposal proceeds, if any, and the carrying amount. It is recognised in surplus or deficit when the asset is derecognised.

1.18 Use of estimates

The preparation of annual financial statements in conformity with Standards of GRAP requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the municipality's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the annual financial statements are disclosed in the relevant sections of the annual financial statements. Although these estimates are based on management's best knowledge of current events and actions they may undertake in the future, actual results ultimately may differ from those estimates.

1.19 Offsetting

Assets, liabilities, revenue and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP

1.20 Segmental information

Segmental information on property, plant and equipment, as well as income and expenditure, is set out in Appendices C and D, based on the International Government Financial Statistics classifications and the budget formats prescribed by National Treasury. The municipality operates solely in its area of jurisdiction as determined by the Demarcation Board.

Segment information is prepared in conformity with the accounting policies applied for preparing and presenting the financial statements.

ACCOUNTING POLICIES

1.21 Research and development expenditure

Research costs are charged against operating surplus as incurred. Development costs are recognised as an expense in the period in which they are incurred unless the following criteria are met:

- The product or process is clearly defined and the costs attributable to the process or product can be separately identified and measured reliably;
- The technical feasibility of the product or process can be demonstrated;
- The existence of a market or, if to be used internally rather than sold, its usefulness to the municipality can be demonstrated;
- Adequate resources exist, or their availability can be demonstrated, to complete the project and then market or use the product or process; and
- The asset must be separately identifiable.

Where development costs are deferred, they are written off on a straight-line basis over the life of the process or product, subject to a maximum of five years. The amortization begins from the commencement of the commercial production of the product or use of the process to which they relate.

Notes to the Annual Financial Statements

	2012 R	Restated 2011 R
2. Trade and other receivables		
Suspense	424,469	615,447
Fuel deposit	1,000	1,000
Pick n Pay Card	2,251	2,251
Other debtors	198,462	922,893

5. Property, plant and equipment (continued)

Revaluations

The effective date of the revaluations was 26 June 2008. Revaluations were performed by independent valuer.Valuations were made on the basis of recent market transactions on arm length terms. The revaluation surplus was credited to revaluation reserve.

Land and buildings are re-valued independently every 5 years.

The carrying value of the revalued assets under the cost model would have been:

Land	178,810	178,810
Buildings	4,865,717	4,984,097

Other information

Property, plant and equipment fully depreciated and still in use (Gross carrying amount)		
Computer Equipment	4,156,241	3,013,801
Furniture and Fittings	2,296,970	2,001,014
Buildings	750,425	-
Motor Vehicles	45,000	4,500
Office Equipment	1,194,777	684,338
Other Assets	321,234	189,186
	8,764,647	**5,892,839**

As at year-end, Work-in-progress (WIP) contained the following amounts for assets as at year-end not yet delivered/received by the Municipality.

The following are the assets that makes up the WIP;		
- Computer Equipment	-	13 514
- Furniture and Fittings	-	90 708
TOTAL	-	**104 222**

Key Assumptions used to determine the recoverable service amount of assets during the period:

The municipality conducted a stock-take/asset count, and in this process the assets' conditions were assessed, and it was determined that no assets were identified to be impaired.

No further information is therefore disclosed, as there were no assets impaired during the period under review.

6. Revaluation reserve

9. Provisions

Reconciliation of provisions - 2012

	Opening Balance	Additions	Total
Long Service Awards	4,707,000	970,000	5,677,000

Reconciliation of provisions - 2011

	Opening Balance	Additions	Total
Long Service Awards	3,597,000	1,110,000	4,707,000

The provision relates to the Long Service Award obligation for the municipal employees. The actuarial valuation was performed in line with the requirements of IAS 19.

Amounts recognised in the statement of Financial Performance are as follows:

Service cost	(849 000)	(647,000)
Interest cost	(401 000)	(337,000)
Expected benefits paid	696 000	667,000
Actuarial gains/(losses)	(416 000)	(793,000)
Net Expenditure recognised	**970 000**	**(1,110,000)**

Amounts recognised in the statement of Financial Position are as follows:

Defined benefit obligation	(5 677 000)	(4,707,000)
Plan Assets	-	-
Funded status	(5 677 000)	(4,707,000)
Unrecognised actuarial (gains) / losses	-	-
Net obligation recognised in the Statement of Financial Position	**(5 677 000)**	**(4,707,000)**

Key assumptions used:

Assumptions used at the reporting date:

Discount rates used	8.00%	8.40 %
Salary inflation	7.50%	7.70 %
Net discount rate	0.47%	0.65 %

The basis on which the discount rate has been determined is as follow:

The discount rate used in the valuation is our best estimate assumption of a CPI inflation rate, consistent with the gross discount rate, is determined with reference to the difference between the yields on government conventional and index-linked bonds as at valuation date, adjusted by a liquidity risk premium of 0.35%. A 2% margin is added to these estimates to arrive at the best estimate assumption for a salary inflation.

Notes to the Annual Financial Statements

	2012 R	Restated 2011 R
10. Government grants and subsidies		
Equitable share	127,132,000	122,988,417
Financial management grant	1,250,000	1,000,000
MSIG	790,000	750,000
Extended Public Works Program Incentive (EPWP)	221,000	-
Provincial Department of Transport - Fire Truck	-	2,000,000
	129,393,000	**126,738,417**
Equitable Share		
Balance unspent at beginning of year	-	-
Current-year receipts	127,132,000	122,988,417
Conditions met - transferred to revenue	(127,132,000)	(122,988,417)
	-	**-**

The Equitable Share is an unconditional grant and is utilised to assist the municipalities to undertake service delivery.

Financial Management Grant		
Balance unspent at beginning of year	-	-
Current-year receipts	1,250,000	1,000,000
Conditions met - transferred to revenue	(1,250,000)	(1,000,000)
	-	**-**

The purpose of the financial management grant is to assist municipalities to implement financial reforms required by MFMA

MSIG		
Balance unspent at beginning of year	-	-
Current-year receipts	790,000	750,000
Conditions met - transferred to revenue	(790,000)	(750,000)
	-	**-**

The fund is used to assist the district in building capacity to perform its functions and stabilise institutional and governance systems as required by the Municipal Systems Act of 2000.

Extended Public Works Program Incentive (EPWP)		
Balance unspent at beginning of year	-	-

23. Retirement Benefit Information

Councilors and employees belong to two defined benefit retirement funds which are the Free State Municipal Pension Fund and the Councilors Pension Fund governed by the Pension Fund Act of 1956. These Funds are subject to triennial actuarial valuation.

The last valuation of the Free State Municipal Pension Fund was performed June 2005. The Free State Municipal Pension Fund, net assets that are available for benefits at 30 June 2005 was R 1 530 775 000.

The actuarial valuation determined that the fund was in a sound financial position. The estimated liability of the funds is R1 308 118 000 which is adequately financed.

No new information was available at balance sheet date.

Notes to the Annual Financial Statements

	2012	Restated 2011
	R	R

24. Prior period errors

The following errors occurred, in relation to the prior financial year, which necessitated corrective action in the current year. The errors were corrected retrospectively in terms of GRAP 3: Accounting Policies, Changes in Accounting Estimates and Errors:

Fire Truck funded by the Department of Transport:

During the 2010-11 financial year, the municipality received funding from the department of transport to purchase a fire truck amounting to R1 997 638 which was erroneously expensed during the 2010-11 financial year.

The correction was made in the previous year against Accumulated Surplus.

The effect on the financial statements is as follows:

Statement of financial position		
Property, plant and equipment	-	1,914,403
Statement of Financial Performance		
Depreciation expense	-	(83,235)
Expenditure: License & Registration	-	(2,362)
Revenue: Government Grants and Subsidies	-	2,000,000
Cash flow statement		
Cash flow from investing activities		
Purchase of Property, Plant and Equipment	-	(1,997,638)

25. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

26. Unauthorised expenditure

Balance at the beginning of the year	-	-
Unauthorised expenditure - current year	272,771	-
Approved/condoned by council	-	-
	272,771	**-**

The municipality incurred unauthorised expenditure during the year under review, that amounted to R272 771. This amount was condoned by council on the 16 August 2012.

27. Fruitless and wasteful expenditure

Opening balance	-	-
Fruitless and wasteful expenditure - current year	5,290	-
Approved/condoned by council	-	-
Transfer to receivables for recovery	-	-
	5,290	**-**

31. Actual operating expenditure versus budgeted operating expenditure

Refer to Appendix E(1) for the comparison of actual operating expenditure versus budgeted expenditure.

32. Actual capital expenditure versus budgeted capital expenditure

Refer to Appendix E(2) for the comparison of actual capital expenditure versus budgeted expenditure.

33. Related parties

Associate of close family member of key management — Pitso Gas Supply of (Mrs F Pitso-LED Manager)

The above related party was identified during the financial year under review.

34. Risk Management

Financial risk management

The District municipality's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

Notes to the Annual Financial Statements

	2012	Restated 2011
	R	R

34. Risk Management (continued)

Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions.

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

The financial liabilities of the District Municipality are backed by appropriate assets and it has adequate liquid resources. The District Municipality monitors the cash projections by ensuring that borrowing facilities are available to meet its cash requirements.

No significant financial risk pertaining to the creditors exists except for mainly operational risks that are not covered in here.

Interest rate risk

The District Municipality is mainly exposed to interest rate risk due to the movements in long-term and short term interest rates.

The risk is managed on an on-going basis.

Credit risk

Credit risk is the risk that a counter party to a financial asset will fail to discharge an obligation and cause the District Municipality to incur financial loss.

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Foreign exchange risk

The District Municipality does not engage in foreign currency transactions.

35. Events after the reporting date

No events took place after the reporting date which has an impact on the Annual Financial Statements.

36. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the annual financial statements.

Deviations from supply chain management regulations did occur. These deviations were submitted and noted by council. A detailed deviation register is available at the municipality for inspection.

39. New standards and interpretations

39.1 Standards and interpretations issued, but not yet effective

The municipality has not applied the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2012 or later periods:

GRAP 18: Segment Reporting

Segments are identified by the way in which information is reported to management, both for purposes of assessing performance and making decisions about how future resources will be allocated to the various activities undertaken by the municipality. The major classifications of activities identified in budget documentation will usually reflect the segments for which an entity reports information to management.

Segment information is either presented based on service or geographical segments. Service segments relate to a distinguishable component of an entity that provides specific outputs or achieves particular operating objectives that are in line with the municipality's overall mission. Geographical segments relate to specific outputs generated, or particular objectives achieved, by an entity within a particular region.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

Directive 2 - Transitional provisions for public entities, municipal entities and constitutional institutions, states that no comparative segment information need to be presented on initial adoption of this Standard.

Directive 3 - Transitional provisions for high capacity municipalities states that no comparative segment information need to be presented on initial adoption of the Standard. Where items have no been recognised as a result of transitional provisions under the Standard of GRAP on Property, Plant and Equipment, recognition requirements of this Standard would not apply to such items until the transitional provision in that Standard expires.

Directive 4 – Transitional provisions for medium and low capacity municipalities states that no comparative segment information need to be presented on initial adoption of the Standard. Where items have not been recognised as a result of transitional provisions un the Standard of GRAP on Property, Plant and Equipment and the Standard of GRAP on Agriculture, the recognition requirements of the Standard would not apply to such items until the transitional provision in that standard expires.

The effective date of the standard is for years beginning on or after 01 April 2013.

The municipality expects to adopt the standard for the first time in the 2014 annual financial statements.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

GRAP 23: Revenue from Non-exchange Transactions

Revenue from non-exchange transactions arises when an entity receives value from another entity without directly giving approximately equal value in exchange. An asset acquired through a non-exchange transaction shall initially be measured at its fair value as at the date of acquisition.

This revenue will be measured at the amount of increase in net assets recognised by the municipality.

An inflow of resources from a non-exchange transaction recognised as an asset shall be recognised as revenue, except to the extent that a liability is recognised for the same inflow. As an entity satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it will reduce the carrying amount of the liability recognised as recognise an amount equal to that reduction.

Notes to the Annual Financial Statements

39. New standards and interpretations (continued)

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

The effective date of the standard is for years beginning on or after 01 April 2012.

The municipality expects to adopt the standard for the first time in the 2013 annual financial statements.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

GRAP 24: Presentation of Budget Information in the Financial Statements

Subject to the requirements of paragraph .19, an entity shall present a comparison of the budget amounts for which it is held publicly accountable and actual amounts either as a separate additional financial statement or as additional budget columns in the financial statements currently presented in accordance with Standards of GRAP. The comparison of budget and actual amounts shall present separately for each level of legislative oversight:

- the approved and final budget amounts;
- the actual amounts on a comparable basis; and
- by way of note disclosure, an explanation of material differences between the budget for which the municipality is held publicly accountable and actual amounts, unless such explanation is included in other public documents issued in conjunction with the financial statements, and a cross reference to those documents is made in the notes.

Where an entity prepares its budget and annual financial statements on a comparable basis, it includes the comparison as an additional column in the primary annual financial statements. Where the budget and annual financial statements are not prepared on a comparable basis, a separate statement is prepared called the ‘Statement of Comparison of Budget and Actual Amounts’. This statement compares the budget amounts with the amounts in the annual financial statements adjusted to be comparable to the budget.

A comparable basis means that the budget and annual financial statements:

- are prepared using the same basis of accounting i.e. either cash or accrual;
- include the same activities and entities;
- use the same classification system; and
- are prepared for the same period.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

The effective date of the standard is for years beginning on or after 01 April 2012.

The municipality expects to adopt the standard for the first time in the 2013 annual financial statements.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

GRAP 103: Heritage Assets

Grap 103 defines heritage assets as assets which have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Certain heritage assets are described as inalienable items thus assets which are retained indefinitely and cannot be disposed of without consent as required by law or otherwise.

A heritage asset should be recognised as an asset only if:

Notes to the Annual Financial Statements

39. New standards and interpretations (continued)

- it is probable that future economic benefits or service potential associated with the asset will to the municipality; and
- the cost of fair value of the asset can be measured reliably.

The standard required judgment in applying the initial recognition criteria to the specific circumstances surrounding the entity and the assets.

Grap 103 states that a heritage asset should be measured at its cost unless it is acquired through a non-exchange transaction which should then be measured at its fair value as at the date of acquisition.

In terms of the standard, an entity has a choice between the cost and revaluation model as accounting policy for subsequent recognition and should apply the chosen policy to an entire class of heritage assets.

The cost model requires a class of heritage assets to be carried at its cost less any accumulated impairment losses.

The revaluation model required a class of heritage assets to be carried at its fair value at the date of the revaluation less any subsequent impairment losses. The standard also states that a restriction on the disposal of a heritage asset does not preclude the entity from determining the fair value.

Grap 103 prescribes that when determining the fair value of a heritage asset that has more than one purpose, the fair value should reflect both the asset's heritage value and the value obtained from its use in the production or supply of goods or services or for administrative purposes.

If a heritage asset's carrying amount is increased as a result of a revaluation, the increase should be credited directly to a revaluation surplus. However, the increase should be recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same heritage asset previously recognised in surplus or deficit. If a heritage asset's carrying amount is decreased as a result of a revaluation, the decrease should be recognised in surplus or deficit. However, the decrease should be debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that heritage asset.

Grap 103 states that a heritage asset should not be depreciated but an entity should assess at each reporting date whether there is an indication that it may be impaired.

In terms of the standard, compensation from third parties for heritage assets that have been impaired, lost or given up, should be included in surplus or deficit when the compensation becomes receivable.

For a transfer from heritage assets carried at a revalued amount to property, plant and equipment, investment property, inventories or intangible assets, the asset's deemed cost for subsequent accounting should be its revalued amount at the date of transfer. The entity should treat any difference at that date between the carrying amount of the heritage asset and its fair value in the same way as a revaluation in accordance with this Standard. If an item of property, plant and equipment or an intangible asset carried at a revalued amount, or investment property carried at fair value is reclassified as a heritage asset carried at a revalued amount, the entity applies the applicable Standard of GRAP to that asset up to the date of change. The entity treats any difference at that date between the carrying amount of the asset and its fair value in accordance with the applicable Standard of GRAP relating to that asset. For a transfer from investment property carried at fair value, or inventories to heritage assets at a revalued amount, any difference between the fair value of the asset at that date and its previous carrying amount should be recognised in surplus or deficit.

The carrying amount of a heritage asset should be derecognised:

- on disposal, or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset should be determined as the difference between the net disposal proceeds, if any, and the carrying amount of the heritage asset. Such difference is recognised in surplus or deficit when the heritage asset is derecognised.

Notes to the Annual Financial Statements

39. New standards and interpretations (continued)

The effective date of the standard is for years beginning on or after 01 April 2012.

The municipality expects to adopt the standard for the first time in the 2013 annual financial statements.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

GRAP 21: Impairment of non-cash-generating assets

Non-cash-generating assets are assets other than cash-generating assets.

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

An municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, an entity estimates the recoverable service amount of the asset.

The present value of the remaining service potential of a non-cash-generating asset is determined using one of the following approaches:

- Depreciated replacement cost approach
- Restoration cost approach
- Service units approach

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss. An impairment loss is recognised immediately in surplus or deficit. Any impairment loss of a revalued non-cash-generating asset is treated as a revaluation decrease.

An municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, an entity estimates the recoverable service amount of that asset.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit. Any reversal of an impairment loss of a revalued non-cash-generating asset is treated as a revaluation increase.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

The effective date of the standard is for years beginning on or after 01 April 2012.

The municipality expects to adopt the standard for the first time in the 2013 annual financial statements.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

GRAP 26: Impairment of cash-generating assets

Cash-generating assets are those assets held by an municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

Notes to the Annual Financial Statements

39. New standards and interpretations (continued)

An entity assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, an municipality estimates the recoverable amount of the asset. When estimating the value in use of an asset, an municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and an municipality applies the appropriate discount rate to those future cash flows.

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss. An impairment loss is recognised immediately in surplus or deficit. Any impairment loss of a revalued cash-generating asset is treated as a revaluation decrease.

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, an municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, an entity use management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

An municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, an municipality estimates the recoverable amount of that asset.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit. Any reversal of an impairment loss of a revalued cash-generating asset is treated as a revaluation increase.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

The effective date of the standard is for years beginning on or after 01 April 2012.

The municipality expects to adopt the standard for the first time in the 2013 annual financial statements.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

Notes to the Annual Financial Statements

39. New standards and interpretations (continued)

GRAP 25: Employee benefits

The objective of GRAP25 is to prescribe the accounting and disclosure for employee benefits. The Standard requires an municipality to recognise:

- a liability when an employee has provided service in exchange for employee benefits to be paid in the future; and
- an expense when an municipality consumes the economic benefits or service potential arising from service provided by an employee in exchange for employee benefits.

GRAP25 must be applied by an employer in accounting for all employee benefits, except share based payment transactions.

GRAP25 defines, amongst others, the following:

- Employee benefits as all forms of consideration given by an municipality in exchange for service rendered by employees;
- Defined contribution plans as post-employment benefit plans under which an municipality pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods;
- Defined benefit plans as post-employment benefit plans other than defined contribution plans;
- Multi-employer plans as defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that:
  - pool the assets contributed by various entities that are not under common control; and
  - use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the municipality that employs the employees concerned;
- Other long-term employee benefits as employee benefits (other than post-employment benefits and termination benefits) that is not due to be settled within twelve months after the end of the period in which the employees render the related service;
- Post-employment benefits as employee benefits (other than termination benefits) which are payable after the completion of employment;
- Post-employment benefit plans as formal or informal arrangements under which an municipality provides post-employment benefits for one or more employees;
- Short-term employee benefits as employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service;
- State plans as plans other than composite social security programmes established by legislation which operate as if they are multi-employer plans for all entities in economic categories laid down in legislation;
- Termination benefits as employee benefits payable as a result of either:
  - an entity's decision to terminate an employee's employment before the normal retirement date; or
  - an employee's decision to accept voluntary redundancy in exchange for those benefits;
- Vested employee benefits as employee benefits that are not conditional on future employment.

The standard states the recognition, measurement and disclosure requirements of:

- Short-term employee benefits;
  - All short-term employee benefits;
  - Short-term compensated absences;
  - Bonus, incentive and performance related payments;
- Post-employment benefits: Defined contribution plans;
- Other long-term employee benefits;
- Termination benefits.

Notes to the Annual Financial Statements

39. New standards and interpretations (continued)

The standard states Post-employment benefits: Distinction between defined contribution plans and defined benefit plans:

- Multi-employer plans;
- Defined benefit plans where the participating entities are under common control;
- State plans;
- Composite social security programmes;
- Insured benefits.

The standard states, for Post-employment benefits: Defined benefit plans, the following requirements:

- Recognition and measurement;
- Presentation;
- Disclosure;
- Accounting for the constructive obligation;
- Statement of financial position;
- Asset recognition ceiling;
- Asset recognition ceiling: When a minimum funding requirement may give rise to a liability;
- Statement of financial performance.

The standard prescribes recognition and measurement for:

- Present value of defined benefit obligations and current service cost:
  - Actuarial valuation method;
  - Attributing benefits to periods of service;
  - Actuarial assumptions;
  - Actuarial assumptions: Discount rate;
  - Actuarial assumptions: Salaries, benefits and medical costs;
  - Actuarial gains and losses;
  - Past service cost.
- Plan assets:
  - Fair value of plan assets;
  - Reimbursements;
  - Return on plan assets.

The standard also deals with Entity combinations and Curtailments and settlements.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

The effective date of the standard is for years beginning on or after 01 April 2013.

The municipality expects to adopt the standard for the first time in the 2014 annual financial statements.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

GRAP 104: Financial Instruments

The standard prescribes recognition, measurement, presentation and disclosure requirements for financial instruments. Financial instruments are defined as those contracts that results in a financial asset in one municipality and a financial liability or residual interest in another municipality. A key distinguishing factor between financial assets and financial liabilities and other assets and liabilities, is that they are settled in cash or by exchanging financial instruments rather than through the provision of goods or services.

Notes to the Annual Financial Statements

39. New standards and interpretations (continued)

One of the key considerations in initially recognising financial instruments is the distinction, by the issuers of those instruments, between financial assets, financial liabilities and residual interests. Financial assets and financial liabilities are distinguished from residual interests because they involve a contractual right or obligation to receive or pay cash or another financial instrument. Residual interests entitle an municipality to a portion of another municipality's net assets in the event of liquidation and, to dividends or similar distributions paid at management's discretion.

In determining whether a financial instrument is a financial asset, financial liability or a residual interest, an municipality considers the substance of the contract and not just the legal form.

Where a single instrument contains both a liability and a residual interest component, the issuer allocates the instrument into its component parts. The issuer recognises the liability component at its fair value and recognises the residual interest as the difference between the carrying amount of the instrument and the fair value of the liability component. No gain or loss is recognised by separating the instrument into its component parts.

Financial assets and financial liabilities are initially recognised at fair value. Where an municipality subsequently measures financial assets and financial liabilities at amortised cost or cost, transactions costs are included in the cost of the asset or liability.

The transaction price usually equals the fair value at initial recognition, except in certain circumstances, for example, where interest free credit is granted or where credit is granted at a below market rate of interest.

Concessionary loans are loans either received by or granted to another municipality on concessionary terms, e.g. at low interest rates and flexible repayment terms. On initial recognition, the fair value of a concessionary loan is the present value of the agreed contractual cash flows, discounted using a market related rate of interest for a similar transaction. The difference between the proceeds either received or paid and the present value of the contractual cash flows is accounted for as non-exchange revenue by the recipient of a concessionary loan in accordance with Standard of GRAP on Revenue from Non-exchange Revenue Transactions (Taxes and Transfers), and using the Framework for the Preparation and Presentation of Financial Statements (usually as an expense) by the grantor of the loan.

Financial assets and financial liabilities are subsequently measured either at fair value or, amortised cost or cost. An municipality measures a financial instrument at fair value if it is:

- a derivative;
- a combined instrument designated at fair value, i.e. an instrument that includes a derivative and a non-derivative host contract;
- held-for-trading;
- a non-derivative instrument with fixed or determinable payments that is designated at initial recognition to be measured at fair value;
- an investment in a residual interest for which fair value can be measured reliably; and
- other instruments that do not meet the definition of financial instruments at amortised cost or cost.

Derivatives are measured at fair value. Combined instruments that include a derivative and non-derivative host contract are accounted for as follows:

- Where an embedded derivative is included in a host contract which is a financial instrument within the scope of this Standard, an entity can designate the entire contract to be measured at fair value or, it can account for the host contract and embedded derivative separately using GRAP 104. An municipality is however required to measure the entire instrument at fair value if the fair value of the derivative cannot be measured reliably.
- Where the host contract is not a financial instrument within the scope of this Standard, the host contract and embedded derivative are accounted for separately using GRAP 104 and the relevant Standard of GRAP.

Notes to the Annual Financial Statements

39. New standards and interpretations (continued)

Financial assets and financial liabilities that are non-derivative instruments with fixed or determinable payments, for example deposits with banks, receivables and payables, are measured at amortised cost. At initial recognition, an municipality can however designate such an instrument to be measured at fair value.

An municipality can only measure investments in residual interests at cost where the fair value of the interest cannot be determined reliably.

Once an municipality has classified a financial asset or a financial liability either at fair value or amortised cost or cost, it is only allowed to reclassify such instruments in limited instances.

An entity derecognises a financial asset, or the specifically identified cash flows of an asset, when:

- the cash flows from the asset expire, are settled or waived;
- significant risks and rewards are transferred to another party; or
- despite having retained significant risks and rewards, an municipality has transferred control of the asset to another municipality.

An municipality derecognises a financial liability when the obligation is extinguished. Exchanges of debt instruments between a borrower and a lender are treated as the extinguishment of an existing liability and the recognition of a new financial liability. Where an municipality modifies the term of an existing financial liability, it is also treated as the extinguishment of an existing liability and the recognition of a new liability.

An municipality cannot offset financial assets and financial liabilities in the statement of financial position unless a legal right of set-off exists, and the parties intend to settle on a net basis.

GRAP 104 requires extensive disclosures on the significance of financial instruments for an municipality's statement of financial position and statement of financial performance, as well as the nature and extent of the risks that an municipality is exposed to as a result of its annual financial statements. Some disclosures, for example the disclosure of fair values for instruments measured at amortised cost or cost and the preparation of a sensitivity analysis, are encouraged rather than required.

GRAP 104 does not prescribe principles for hedge accounting. An municipality is permitted to apply hedge accounting, as long as the principles in IAS 39 are applied.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

The effective date of the standard is for years beginning on or after 01 April 2012.

The municipality expects to adopt the standard for the first time in the 2013 annual financial statements.

It is unlikely that the amendment will have a material impact on the municipality's annual financial statements.

GRAP 20: Related parties

The objective of this standard is to ensure that a reporting entity's annual financial statements contain the disclosures necessary to draw attention to the possibility that its financial position and surplus or deficit may have been affected by the existence of related parties and by transactions and outstanding balances with such parties.

An entity that prepares and presents financial statements under the accrual basis of accounting (in this standard referred to as the reporting entity) shall apply this standard in:

- identifying related party relationships and transactions;
- identifying outstanding balances, including commitments, between an entity and its related parties;
- identifying the circumstances in which disclosure of the items in (a) and (b) is required; and

Notes to the Annual Financial Statements

39. New standards and interpretations (continued)

- determining the disclosures to be made about those items.

This standard requires disclosure of related party relationships, transactions and outstanding balances, including commitments, in the consolidated and separate financial statements of the reporting entity in accordance with the Standard of GRAP on Consolidated and Separate Financial Statements. This standard also applies to individual annual financial statements.

Disclosure of related party transactions, outstanding balances, including commitments, and relationships with related parties may affect users' assessments of the financial position and performance of the reporting entity and its ability to deliver agreed services, including assessments of the risks and opportunities facing the entity. This disclosure also ensures that the reporting entity is transparent about its dealings with related parties.

The standard states that a related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control. As a minimum, the following are regarded as related parties of the reporting entity:

- A person or a close member of that person's family is related to the reporting entity if that person:
  - has control or joint control over the reporting entity;
  - has significant influence over the reporting entity;
  - is a member of the management of the entity or its controlling entity.
- An entity is related to the reporting entity if any of the following conditions apply:
  - the entity is a member of the same economic entity (which means that each controlling entity, controlled entity and fellow controlled entity is related to the others);
  - one entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of an economic entity of which the other entity is a member);
  - both entities are joint ventures of the same third party;
  - one entity is a joint venture of a third entity and the other entity is an associate of the third entity;
  - the entity is a post-employment benefit plan for the benefit of employees of either the entity or an entity related to the entity. If the reporting entity is itself such a plan, the sponsoring employers are related to the entity;
  - the entity is controlled or jointly controlled by a person identified in (a); and
  - a person identified in (a)(i) has significant influence over that entity or is a member of the management of that entity (or its controlling entity).

The standard furthermore states that related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

The standard elaborates on the definitions and identification of:

- Close member of the family of a person;
- Management;
- Related parties;
- Remuneration; and
- Significant influence

The standard sets out the requirements, inter alia, for the disclosure of:

- Control;
- Related party transactions; and
- Remuneration of management

The effective date of the standard is for years beginning on or after 01 April 2013.

The municipality expects to adopt the standard for the first time in the 2014 annual financial statements.

41. Employee benefit obligations

Defined benefit plan

The defined benefit plan, to which employees belong, consists of the Free State Municipal Pension Fund and the Councilors Pension Fund governed by the Pension Fund Act of 1956.

The actuarial valuation determined that the retirement plan was in a sound financial position.

Post retirement medical aid plan

The Post Retirement Benefit Plan is a defined benefit plan, of which the members are made up as follows:

In-service (employee) members	107	87
Continuation members (e.g: Retirees, widows, orphans)	3	3
Total Members	**110**	**90**

The municipality make monthly contributions for health care arrangements to the following medical aid schemes:

- LA Health Medical Scheme
- Bonitas Medical Scheme
- Hosmed Medical Scheme
- Samwumed Medical Scheme
- KeyHealth Medical Scheme

The amounts recognised in the statement of financial position are as follows:

Carrying value		
Present value of the defined benefit obligation-wholly unfunded	(5,643,000)	(3,483,000)
Service Cost	(480,000)	(321,000)
Interest Cost	(541,000)	(339,000)
Actuarial gains or (losses)	127,000	(1,572,000)
Actual benefits paid	97,000	72,000
Net liability	**(6,440,000)**	**(5,643,000)**

Key assumptions used

Assumptions used at the reporting date:

Discount rates used	9.20 %	9.25 %
Healthcare cost inflation	7.50 %	7.70 %
Net discount rate	1.58 %	1.44 %

The basis on which the discount rate has been determined is as follow:

The discount rate used in the valuation is determined by reference to market yields on high quality corporate bonds as at the balance sheet date. In countries where there is no deep market in corporate bonds, government bonds are used. It is currently market practice to use government bond yields, as the South African corporate bond market is not considered to be sufficiently developed. The currency and term of the government bonds shall be consistent with the currency and estimated term of the post-employment benefit obligations.

Notes to the Annual Financial Statements

	2012	Restated 2011
	R	R

41. Employee benefit obligations (continued)

The estimated discount rate was set equal to the yield on a zero-coupon government bond with a term of approximately 19 years.

Defined contribution plan

It is the policy of the municipality to provide retirement benefits to all its employees. A number of defined contribution provident funds, all of which are subject to the Pensions Fund Act exist for this purpose.

The municipality is under no obligation to cover any unfunded benefits.

42. Unspent conditional grants and receipts

See appendix "F2" for a detailed reconciliation of grants from other spheres of government. The Unspent Grants are cash-backed by term deposits. The municipality complied with the conditions attached to all grants received to the extent of revenue recognised. No grants were withheld during the year.

Unspent conditional grants and receipts comprises of:

Unspent conditional grants and receipts		
DWA Feasibility Study Funding	450,000	-
Department of Health - Relebohile Clinic: Ngwathe Local Municipality	4,324,692	13,503,163
Department of Roads, Transport and Police - Internal Roads: Ngwathe Local Municipality	732,391	732,391
EPWP Project - Sidewalks: Metsimaholo Local Municipality	117,428	897,157
Department of Public Works - Church: Ngwathe Local Municipality	85,794	276,926
Department of Sports - Grant: Fezile Dabi Stadium	24,410,077	27,211,831
EPWP - Metsimaholo Hospital	2,278,555	10,000,000
DWAF	656,147	1,228,090
EPWP - Paved Roads (Mafube)	540,825	911,560
LOTTO Grant	1,900,000	1,900,000
	35,495,909	**56,661,118**

Movement during the year

Balance at the beginning of the year	56,661,118	21,157,111
Additions during the year	20,523,111	75,702,081
Income recognition during the year	(41,688,320)	(40,198,074)
	35,495,909	**56,661,118**

The nature and extent of government grants recognised in the annual financial statements and an indication of other forms of government assistance from which the municipality has directly benefited; and Unfulfilled conditions and other contingencies attaching to government assistance that has been recognised.

These amounts are invested in a ring-fenced investment until utilised.

Notes to the Annual Financial Statements

	2012	Restated 2011
	R	R

43. Operating lease

The municipality rents photocopy machines from Journey Vehicle & Assets Finance (Bloemfontein) CC, being the major supplier:

- no contingent rent is payable in terms of the lease agreements.
- there is no renewal or purchase options as per lease agreement terms, and the lease escalates as determined in the various lease agreements with the renter; and
- no restrictions are imposed by lease arrangements, with regards to additional debt and further leasing.

The lease agreements is for a total period of 60 months (5 years).

44. Commitments

Operating leases - as lessee (expense)

Minimum lease payments due		
- within one year	1,289,819	3,987,439
- in second to fifth year inclusive	-	1,289,819
- later than five years	-	-
	1,289,819	**5,277,258**
